Luna and Lysta have a choice of three arm lengths, specified by adding a suffix to the product code.

Description	Suffix	Head projection (cm)
long	L	44
medium	M	34
short	S	24

Installation information

This light has an LED controller 56 x 40 x 20mm which needs to be accommodated within the surface that it is being mounted to. Where no space is available for the controller please use the 'enclosed controller' version.

The bedhead version is supplied with two different lengths of threaded tube 40 and 60mm and 1.5metres of cable to allow for differing mounting requirements. Longer cable can be made available on other versions if requested when ordering.
